

Curricular aspects of the institute, which is affiliated to the University of Mumbai, follow the prescribed syllabus. Faculty participates in curriculum design workshops, and feedback from industries and alumni is considered. The academic calendar is prepared before the semester based on the university calendar. The teaching-learning process includes lectures, labs, seminars, mini-projects, guest lectures, industrial visits, and assignments. Blended learning models are used, and outcome-based learning is encouraged. Extra coaching is provided for weak students. A faculty handbook is maintained, which includes the teaching plan, execution, attendance, evaluation, timetable, academic calendar, result analysis, defaulters list, etc. Activities like seminars, workshops, MoUs with industries, industrial visits, technical activities, value-added programs, and certificate courses are conducted for professional development. Curriculum delivery is a well-planned, documented process coordinated exclusively by student representative Vedant Bhamare. Workload is calculated by the HOD, and subject allocation is based on expertise. The timetable is prepared, and the academic calendar is approved by the academic council and distributed before the semester. The faculty handbook includes the session plan, timetable, academic calendar, text books, experiments, assignments, attendance, evaluation marks, and course file maintained with syllabus, notes, lab manual, question papers, and course outcomes mapping with program outcomes. Gap analysis is done covering prerequisite gaps, course gaps, semester gaps, and program gaps, which are addressed through guest lectures, seminars, workshops, value-added courses, industrial visits, and projects. Prerequisite tests are conducted at the beginning of the semester to identify strengths and weaknesses. ICT tools and active learning strategies are used, alongside an online learning management system and an implemented mentor-mentee scheme. Notifications are sent through official emails. Syllabus coverage is reviewed fortnightly by the HOD and monthly by the Principal, and corrective actions are taken. Student feedback is collected for faculty, curriculum, and infrastructure, and actions are taken. For certificate and diploma programs introduced in the last five years, the number is 0. The percentage of teachers' participation in academic bodies is around 12 percent. Regarding academic flexibility, new courses introduced are approximately 204 in the last five years, which is around 45 percent. The CBC system is implemented in some programs. Approximately 60 percent of students are enrolled in add-on, certificate, or diploma programs, specifically 67.4 percent. Curriculum enrichment includes gender, environment, sustainability, human values, and professional ethics. An IV was planned at LTI Mindtree, Mahape for practical exposure. Environmental studies is a compulsory course in the first year for awareness on sustainability and conservation. A business communication ethics course is included. Printing and packaging includes sustainability, waste management, and laws. Internships are part of the curriculum, and professional ethics and renewable energy topics are included. Students are encouraged to do projects on real-world problems and ethics practice. There are approximately 12 value-added courses, and internships involve around 266 students, which is approx 14 percent. The feedback system involves structured feedback from students, teachers, employers, alumni, and parents, which is collected, analysed, and action is taken.
